EDUCATION

2025	Certified Scrum Master (CSM) by Oriensys Solutions.
2025 - 2026	Master's in Software Engineering at Supemir — Higher School of Engineering and Management, Casablanca.
2024	Certified in OWASP Security (Secure Coding - Secure Application Development) by Oriensys Solutions.
2023 - 2024	Professional Bachelor's Degree in Software Development at Hassan II University of Sciences in Casablanca.
2021 - 2023	Specialized Technician in Computer Infrastructure at ISFO (OFPPT) in Casablanca.

EXPERIENCE

Mar 2025 - Present	<u>Full-time: DevOps Engineer at <i>AriaTech (Accolade SA)</i></u> - Designed and delivered a custom online training platform, providing companies with dedicated learning spaces for their employees. - Implemented and managed server and application monitoring with Prometheus and Grafana, including dashboards and alerting for production visibility. - Designed and deployed a DevSecOps platform to automate security in GitLab CI/CD pipelines, with integration of SonarQube (SAST), OWASP ZAP (DAST), and OWASP Dependency-Check (SCA) for continuous vulnerability checks.
Jul 2024 - Mar 2025	<u>Full-time: Development and Research Engineer at <i>AriaTech (Accolade SA)</i></u> - Revamped a full-stack insurance application for the "Bathing Associations" by enhancing backend services and frontend management workflows, and passed the annual audit with an excellent score. - Refactored the transport module in "Nawrass", the main system for managing AFMA activities, improving maintainability and delivery speed. - Developed an automated API-based solution for data exchange between AFMA and Autohall.

May - Jul 2024	<u>Internship: Fullstack Developer & DevOps at Valhko</u> Developed an AI-powered news platform focused on finance and investments across the African continent, and contributed to deployment and operational reliability from development to release.
Feb - Apr 2024	<u>Internship: Fullstack Developer at Rivertech</u> Developed the company's main website.
Nov - Jan 2024	<u>Internship: Fullstack Developer at AMDD.</u>
Apr - Nov 2023	<u>Internship: Software Developer at Maxmind</u>
Jun - Aug 2022	<u>Internship: Fullstack Developer at Sirecom</u>

COMPETENCIES

- Strong understanding of software architecture patterns and scalable system design.
- Hands-on experience delivering full-stack features across **backend APIs**, business workflows, and frontend UI.
- Good understanding of **Java backend** and **React frontend** patterns for maintainable web applications.
- Good understanding of web standards, API contracts, testing, and maintainable coding best practices.
- Ability to build and optimize **CI/CD pipelines** for reliable and secure delivery.
- Practical knowledge of **DevSecOps**, secure coding, and OWASP-aligned security controls.
- Strong troubleshooting mindset for production incidents using logs, metrics, and monitoring signals.
- Continuous learner, self-taught**, and comfortable adapting quickly to new tools.
- Active listener** and **good communicator** in cross-functional Agile teams.
- Strong **organizational skills** and attention to detail.
